## Liquid Cooled Gas Engine Generator Sets

### Continuous Standby Power Rating

15kW 60 Hz

20kW 60 Hz

### Prime Power Rating

11kW 60 Hz

15kW 60 Hz

Generac  
100 Amp Automatic  
Transfer Switch (UL Listed)  
Included with Models 04721  
& 04723. Available for models  
04722 & 04724

### Models:

04721 (15kW/Single Phase NG or LPV)

04722 (15kW/Single Phase NG or LPV)

04723 (20kW/Single Phase NG or LPV)

04724 (20kW/Single Phase NG or LPV)

UL 2200 Listed

Power Matched

**GENERAC MMC 4G15 ENGINE**

Naturally Aspirated

**2 Year Limited Warranty**

## FEATURES

- INNOVATIVE DESIGN & PROTOTYPE TESTING** are key components of GENERAC'S success in "IMPROVING POWER BY DESIGN." But it doesn't stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.
- TEST CRITERIA:**
  - ✓ **PROTOTYPE TESTED**
  - ✓ **SYSTEM TORSIONAL TESTED**
  - ✓ **ELECTRO-MAGNETIC INTERFERENCE**
  - ✓ **NEMA MG1-22 EVALUATION**
  - ✓ **MOTOR STARTING ABILITY**
- SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION.** This state-of-the-art power maximizing regulation system is standard on all Generac models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine.
- SINGLE SOURCE SERVICE RESPONSE** from Generac's dealer network provides parts and service know-how for the entire unit, from the engine to the smallest electronic component. You are never on your own when you own a GENERAC POWER SYSTEM.
- GENERAC TRANSFER SWITCHES.** Long life and reliability are synonymous with GENERAC POWER SYSTEMS. One reason for this confidence is that the GENERAC product line includes its own transfer systems and controls for total system compatibility.

## GENERATOR SPECIFICATIONS

|  |                                |
|--|--------------------------------|
| TYPE Home Standby 15 .....                     | Four-pole, revolving field     |
| TYPE Home Standby 20 .....                     | Two-pole, revolving field      |
| ROTOR INSULATION .....                         | Class F                        |
| STATOR INSULATION .....                        | Class F                        |
| VOLTAGE WAVE FORM DEVIATION .....              | <5%                            |
| TOTAL HARMONIC DISTORTION (line to line) ..... | <5%                            |
| TELEPHONE INTERFERENCE FACTOR (TIF) .....      | <50                            |
| ALTERNATOR .....                               | Self-ventilated and drip-proof |
| BEARINGS (PRE-LUBED & SEALED) .....            | 1                              |
| COUPLING .....                                 | Direct, Flexible Disc          |
| LOAD CAPACITY (STANDBY) .....                  | 100%                           |

**NOTE: Emergency loading in compliance with NFPA 99, NFPA 110, paragraph 5-13.2.6. Generator rating and performance in accordance with ISO8528-5, BS5514, SAE J1349, ISO3046, and DIN6271 standards.**

### EXCITATION SYSTEM

|                  |                                       |
|------------------|---------------------------------------|
| DIRECT .....     | DC excitation system ✓                |
|                  | Low-velocity brushes and slip rings ✓ |
| REGULATION ..... | Solid-state ✓                         |
|                  | ±1% regulation ✓                      |

## GENERATOR FEATURES

- Two/Four pole, revolving field generator, directly connected to the engine shaft through a heavy-duty, flexible disc for permanent alignment.
- Generator meets temperature rise standards for class "F" insulation as defined by NEMA MG1-22.
- Stator windings are "trickle" varnished and rotor windings are "roll-dipped" for complete Class H impregnation.
- Unit tested for motorstarting ability by measuring instantaneous voltage dip with a waveform data acquisition system.
- All models utilize an advanced wire harness design for reliable interconnection within the circuitry.
- Magnetic circuit, including amortisseur windings, tooth and skewed stator design, provides a minimal level of waveform distortion and an electromagnetic interference level which meets accepted requirements for standard AM radio, TV, and marine radio telephone applications.
- Voltage waveform deviation, total harmonic content of the AC waveform, and balanced T.I.F. (Telephone Influence Factor) have been evaluated to acceptable standards in accordance with NEMA MG1-22.
- Alternator is of drip-proof guarded construction.
- Fully life-tested protective systems, including "field circuit and thermal overload protection" and standard mainline circuit breakers capable of handling full output capacity.
- System torsional acceptability confirmed during prototype testing.

Rating definitions - Standby: Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BS5514, ISO3046 and DIN6271). Prime (Unlimited Running Time): Applicable for supplying electric power in lieu of commercially purchased power. Prime power is the maximum power available at variable load. A 10% overload capacity is available for 1 hour in 12 hours. (All ratings in accordance with BS5514, ISO3046, ISO8528 and DIN6271).

## ENGINE SPECIFICATIONS

|                               |                          |

# STANDARD ENGINE & SAFETY FEATURES

Home Standby - 15

Home Standby - 20

- High Coolant Temperature Automatic Shutdown
- Low Coolant Level Automatic Shutdown
- Low Oil Pressure Automatic Shutdown
- Overspeed Automatic Shutdown (Solid-state)
- Crank Limiter (Solid-state)
- Oil Drain Extension
- Radiator Drain Extension
- Factory-Installed Cool Flow Radiator
- Closed Coolant Recovery System
- Engine Block Heater
- Rubber-Booted Engine Electrical Connections
- Fuel Lockoff Solenoid
- Isochronous Governor
- Secondary Fuel Regulator (N.G. and L.P.)
- Weather Protective Enclosure (Locking Type)
- Battery Charge Alternator
- Battery Cables
- Battery Tray
- Vibration Isolation of Unit to Mounting Base
- 12 Volt, Solenoid-Activated Starter Motor
- Air Cleaner
- Fan Guard
- Control Console
- UV/Ozone Resistant Hoses
- Stainless Steel Flexible Exhaust Connection
- Flexible Fuel Line
- Critical Exhaust Silencer
- Battery Trickle Charger
- Main Line Circuit Breaker
- Automatic Transfer Switch  
(Included with models 04721 & 04723 only)

## Home Standby Control Features:

**Home Standby Control Console**  
 Manual/Auto/Off switch  
 Hour meter  
 Fault indicator lamp  
 Fuse (panel overload)  
 Set exercise time switch

**Home Standby Microprocessor Controls**  
 Automatic voltage regulation  
 Utility voltage sensing  
 Utility interrupt delay  
 (10-second setpoint)  
 Engine warm-up  
 (10-second setpoint)  
 Engine cool-down  
 (1-minute setpoint)  
 Seven-day exerciser
